one of cardinal Importance. He left South Africa two months ago and through London. He is seeking a little rest and restoration, having a bad liver after three years of war work in overthrowing the Boer government. The fashionable season had ended when Lord Milner arrived. Not a dozen people were staying at Koenig's villa, the hotel where he took up his residence. In the most democratic, free manner he formed the acquaintance of the few belated guests.

The arrival of the king's messenger with an urgent request to enter the cabinet seemed like an interruption from the outside world. It disturbed the routine of his simple life among the people, who tacitly avoided reference to politics, but the messenger departed and the next day Lord Milner resumed his social intercourse. He had breakfast with a little American boy of 7, who shared with this ruler of South Africa some fish he had caught the day before.

Evangelist Asserts Preacher and Choir Are Intended Only for Amusement,

DETROIT, Sept. 27.- The convention of the Disciples of the Lord was opened today. The day was devoted to religious exercises and the principal speaker was Evangelist John Smith of Cleveland, who claims he is called to preach the gospel of Christ by God Himself. He made a bitter attack on all forms of worldly amusement. which he characterized as being the works of the devil. In his opinion it is for worldly amusement only that the majority of people attend church. The church of today is nothing more than a circuit of the theater. he declared, while the choirs who sing the beautiful and sacred hymns in many cases paid large salaries to stand up and prostimost of the high priced ministers, he continued, is only a base proposition, as they are hired for the amusement they can give been formed for this purpose." to their congregations. Count De Lavauix is one of the best French aeronauts and he has made severalvery interesting aerial voyages. In August, 1962, he made the record trip for that year, having ascended from St. Cloud, near Paris, and landed at Opoes, Hesse, a distance of over 419 miler, which he covered in nineteen hours. In 1901 and again in 1903, accompanied by French war ships, he made endeavors to cross the Mediterranean from Marsellles to Algeria in a balloon to which was attached a floating apparatus intended to aid the balloonists in keeping their course, with a view to demonstrating the possible utility of balloons in time of war. Both of these efforts were unsuccessful, the halloons being driven back to the north coast of the Mediterranean. Last January Count De Lavaulx sent a trial balloon from CARLSBAD, Sept. 27,-(New York World Gabes, in Tunis, across the desert of Sahara with a view to ascertaining the feasibility of an aerial trip across the desert.

today, saw many cases of fever, and at the conclusion of his day's examination made the announcement that twelve of the cases were genuine yellow fever. The daughter of the Mexican boiler maker, Juan Continus, who died of the fever recently, died late this afternoon and another Mexican woman also died of the disease.

This city now presents a dead appearance all those who could get away having departed for points north in the state of Texas and for points south. It is estimated by the authorities that nearly 4,000 people have fled from here since the beginning of the yellow fever scare. The city is now quarantined in all directions in the state and no person can get beyond the limits of Webb county, as other Texas countles have established a shotgun quarantine and are turning all back who are endeavoring to get away in coaches, bugthe cable service to Buena Ventura will be gies and carts. The quarantine applies to all persons, freight, buggage, express, mail or other matter originating in the city of Laredo or points south, the only persons having authority to leave the corporation limits being the health officers of the state of Texas and of the United States.

> The work of placing the city in a thoroughly sanitary condition is being carried on under the direct supervision of Dr. Guiteras and a corps of expert assistants. The situation in Nuevo Laredo is unchanged, no death or new cases having occurred as far as can be learned. Dr. Mariano Trevino, a Mexican government yellow fever expert, is in charge. He declares that

within eight days he will have stamped out the fever. The Mexican custom house authorities have temporarily removed to Lampasas, where all incoming baggage and freight over the National rullway is examined, thus permitting trains through to Laredo without stopping at Nuevo Laredo. On Tuesday afternoon the president will have as a guest at luncheon John Mitchell, president of the United Mine Workers of America. vited Mr. Mitchell to take luncheon dine with him when he next came to Wash ington. The mine workers' president is in Washington now. It is announced that arrangement for the luncheon was made prior to the latest developments in the case of W. H. Miller, the foreman book binder in the government printing office and that no special significance is to be attached to the fact that the president and Mr. Mitchell meet at this time. It is probable that the Miller case, among other matters, will be disquissed, but the meeting will not take the form of a conference on

that subject. In view of the statements recently pub lished that the president on his return to Washington would hold a conference on the Miller case with prominent representatives of organized labor it is announced that the president has no intention of conferring with anybody regarding that case His position, it is pointed out, was defined learly in his published letters to Secretary Cortelyou. The principle enunciated in those letters was framed in accordance with the statutes of the United States and on it the president expects to stand. If a hearing on the merits of the Miller case is desired by those who are endeavoring to have the man dismissed from the government service, the president may grant i precisely as he might a hearing to any other body of citizens on a question of public interest, but it is not the president's purpose to enter upon a discussion of the principle already laid down.

The democracy has not been beaten on these issues by republican votes alone by any means. It has been beaten chiefly by democratic votes. The democratic party of the city has all the issues in its favor except opposition prevented them from disclosing these two. It is easily within its lower these two. It is easily within its power to throw off their dead weight when it makes up its mind to do so. Its right to dominancy will be restored as soon as it does. There can be no doubt of the result of any campaign in which the party explicity and without equivocation commits itself to reforms for which the city has four times voted in ten years. partisan speeches containing criticism of four times voted in ten years.

Mr. Nixon would say nothing more about the administration of President Roosevelt.
